Project Initialization and Planning Phase

Date	29 September 2026
Team ID	VANI P
Project Name	FitBuddy - AI Fitness Plan Generator using Gemini Models
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand the customer's point of view. The Customer Problem Statement template helps the team focus on what matters to users and what experiences they expect from the product. For LegalEase, the problem statement focuses on people who need to prepare basic legal document drafts but may find the process time-consuming, confusing, or difficult to format.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A person who needs a legal document draft.	Create a suitable legal document quickly.	I may not know the correct format, clauses, or information required.	Legal documents can be complicated and time-consuming to prepare manually.	Confused and concerned about making mistakes.
PS-2	A student or small business user.	Generate a professional document from basic details.	Existing templates may not match my requirements.	Different documents require different structures and details.	Frustrated and looking for a simple solution.

Proposed Solution: LegalEase is an AI-powered legal document drafting application that collects user-provided information, generates a structured document draft, allows the user to preview and edit it, and provides PDF download. The generated content is intended as drafting assistance and should be reviewed by a qualified legal professional where appropriate.
