4. Demo Step 3 – Generate Plan

Click Generate Plan. The backend sends the prepared prompt to Gemini and receives the generated response.

Tabulation

Demo Step	Action
1	Open application
2	Enter sample details
3	Generate AI plan
4	Explain output
5	Show validation/error case

Coding / Technical Example

```
Demo flow:
User Input
    ↓
Generate Plan
    ↓
Gemini API
    ↓
AI Response
    ↓
FitBuddy Result Page
```

Picture / Diagram

```
OPEN APP → ENTER DETAILS → GENERATE → AI RESPONSE → EXPLAIN RESULT
```

5. Demo Step 4 – Display Result

Show the structured weekly plan and explain how the information is organized for easy reading.

Tabulation

Demo Step	Action
1	Open application
2	Enter sample details
3	Generate AI plan
4	Explain output
5	Show validation/error case

Coding / Technical Example

```
Demo flow:
User Input
    ↓
Generate Plan
    ↓
Gemini API
    ↓
AI Response
    ↓
FitBuddy Result Page
```

Picture / Diagram

```
OPEN APP → ENTER DETAILS → GENERATE → AI RESPONSE → EXPLAIN RESULT
```

6. Demo Step 5 – Error Scenario

Demonstrate a simple validation case such as an empty required field and show the application's error message.

Tabulation

Demo Step	Action
1	Open application
2	Enter sample details
3	Generate AI plan
4	Explain output
5	Show validation/error case

Coding / Technical Example

```
Demo flow:
User Input
    ↓
Generate Plan
    ↓
Gemini API
    ↓
AI Response
    ↓
FitBuddy Result Page
```

Picture / Diagram

```
OPEN APP → ENTER DETAILS → GENERATE → AI RESPONSE → EXPLAIN RESULT
```

7. Demo Conclusion

Summarize the AI workflow, main features, limitations and possible future improvements.

Tabulation

Demo Step	Action
1	Open application
2	Enter sample details
3	Generate AI plan
4	Explain output
5	Show validation/error case

Coding / Technical Example

```
Demo flow:
User Input
    ↓
Generate Plan
    ↓
