Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I need a legal document quickly." • "I don't know the correct format." • "Can I edit the document before downloading?"	**THINKS** • "Will the document contain the required details?" • "I want a simple and reliable process." • "I should review the draft before using it."	**PERSONA NAME** **Legal Document User** ***(Role / User Type)***
DOES • Searches for templates online. • Enters personal/document details. • Reviews, edits and downloads the document.		**FEELS** • Confused by legal terminology. • Concerned about making mistakes. • Relieved when the drafting process is simple.

Customer Need Identified: Users need a simple way to provide basic information, generate a structured legal document draft, review it, and download it without struggling with formatting. LegalEase addresses this need through guided forms, AI-assisted drafting, preview/editing, and PDF generation.
